DETAILED ACTION

Election/Restrictions

1. The cancellation of claims 1-29 and the addition of new claims 30-39 is acknowledged. However, the added new claims are subject to a restriction as follows.

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 30-35, drawn to a method for diagnosing tumor with an antibody that binds an epitope 52-60 of uPAR.

Group II, claim(s) 36-39, drawn to an polypeptide/antibody.

3. The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the method of Group I uses an antibody that binds 52-60 of uPAR which can be any antibody, however, the antibody in Group II recites specific CDRs and is not stated to bind 52-60 of uPAR.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter and different searches in the patent literature, restriction for examination purposes as indicated is proper.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
